John Carlo B. Estacio

Junior Front/Back End Developer Intern

Email: loyyyyestacio@gmaill.com

GitHub: github.com/loyyyyestacio

LinkedIn: linkedin.com/in/carlo-estacio-a69768447

Preferred setup: Bulacan / Metro Manila / Remote

Professional Summary

Student developer at the Bulacan State University College of Industrial Technology who builds both the screens people see and the logic behind them. I work carefully, test what I make, and I am looking for an OJT team where I can contribute to real front-end and back-end tasks.

Internship Details

- **Training hours required:** 500 hours
- **Availability:** Starting 2nd Semester A.Y. 2026–2027

Education

Bulacan State University, College of Industrial Technology

Bachelor of Science in Industrial Technology, Major in Computer Technology

Expected graduation: 2027

Core Competencies

- Building responsive layouts that hold up on phones and desktops
- Front-end and back-end development for offline-capable apps
- Testing and debugging hardware and software behavior
- Version control basics and clear technical documentation

Technical Skills

- **Front-end and core web:** HTML5, CSS3, Flexbox, CSS Grid, Responsive Design, JavaScript (basic)
- **Tools and platforms:** Git/GitHub, VS Code, Claude, ChatGPT, Cursor, GitHub Copilot
- **Design and digital media:** Layout prototyping, UI design systems, asset optimization, vector icons
- **Industrial and technical foundations:** Arduino, circuit testing, hardware debugging, hardware servicing, network configuration

Featured Projects

LearnHive — Front-End and Back-End Developer

A mobile app that keeps working when the internet drops. Designed the screens students use and built the back-end logic that saves data on the device so nothing is lost while offline.

Arduino-Based Automatic Exhaust Fan Controller — Tester and Debugger

An electronic controller that changes the exhaust fan speed according to the room temperature, so the fan runs harder only when the room needs it. Tested the circuit and code under different temperatures and debugged the faults found.

Individual Web Portfolio — Developer

Responsive personal portfolio built with semantic HTML5, external CSS3 and JavaScript, including an interactive temperature-controlled fan preview, deployed on a free static hosting platform.
